

21.5" FHD Medical Touchscreen Display

FS-E2102DT

Crystal Clear Full High Definition Images

This touchscreen medical display is ideal for controlling a user interface, or manipulating images in applications that incorporate endoscopic cameras, ultrasound, cardiology, room or boom cameras, patient vital signs, and more. It displays images with near zero latency, and is compatible with major MIS camera systems in use.

User Friendly

FS-E2102DT features an intuitive, on-screen menu for image and layout settings. Multi-modality options let doctors view PIP, PBP, or triple images at the same time. The rounded monitor housing corners help protect OR personnel from accidental bumping injuries. Its lightweight design is ideal for boom or spring-arm mounting, and the front surface is edge-to-edge glass for fast, easy cleaning.

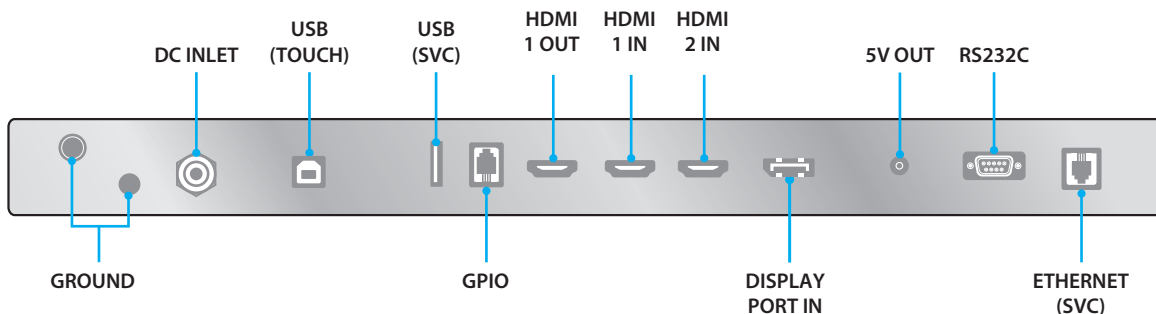

Fingertip Control

FS-E2102DT is a projected capacitive multi-touch screen that is designed for medical applications, including complex user interfaces.

The touchscreen offers convenient data and image control for clinicians. It features a high brightness LED back light and rich color calibration for FHD medical grade image consistency. Like other FSN displays, this model has a complete set of features designed for presenting images from sophisticated medical video equipment.
